by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gels inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

Direct testimony is always better than hearsay evidence. If you desire to know alout Bevel-Gear Chainless bicycles, do not ask a person who has never riden one, or is in any way connected with a manufacturer who does not make them. Inquire of riders of the Columbia Bevel-Gear Chainless. There are thousands of them throughout the country. They are to be met in every city, in almost every town of the United States—so popular has the machine become in the short space of a year and a half. There are reasons for this. The Chainless is easier to take care of than the chain wheel. It has a longer life. Every onne of power applied to the pedals is made effective. This last advantage over chaindriven wheels is apparent the moment you mount the machine. The Chainless seems to possess an activity and life of its own. You notice it in starting, stopping, backpeedling, riding on levels, and especially in ascending grades.
